Zero

Paper waste. Nothing to reprint, ever

WHY PROFESSIONALS SWITCH

Paper cards get misplaced. Your Beeps Card stays on their phone forever.

The paper card you carry today

- Outdated the moment your number or role changes
- Reprinted two or more times a year, at a cost
- Carries a name and a number — nothing else
- You never know if it was kept or binned
- Runs out at the exact meeting that mattered

The Beeps Card you carry once

- Edit once from your phone — every shared card updates live
- One card, printed once, used for a lifetime
- Carries products, gallery, UPI, reviews and booking
- Analytics show views, locations and link clicks
- Never runs out — share by tap, QR, chat or email

Does it work on every phone?

Yes — iPhone XS and later, and most NFC Android phones. If a client's phone has no NFC, they simply scan the QR printed on your card.

How long does the card last?

The NFC chip has no battery and lasts a lifetime. Your card keeps working for as long as your yearly subscription stays active.

Can I start without the card?

Yes. Use the digital profile alone, share it by link, and print your custom QR on existing paper cards or marketing material.

Replace your paper visiting card. Start tapping.
